

CEZARA BORSAN

cezaraborsan.github.io

Summary

Hi, I'm Cezara! About a year ago, I decided to pursue a career in web development. Since then, my interest in website and application design has led me to discover and thoroughly learn various technologies (HTML, CSS, JavaScript, etc.). During this journey, I found a lot of enjoyment while working on a variety of self-developed projects. Therefore, I'm now looking forward to join a team and further expand my knowledge in the field.

Experience

Application Specialist @ Continental Automotive

Nov 2021 - Present • Iasi, Romania / Remote

- Providing Product Data Management (PDM) and Product Lifecycle Management (PLM) support.
- Responsible for performing SAP tasks as a maintenance user for medium to high complexity projects: updating products and parts, creating documents and material numbers, checking and classifying documents, and creating product structures;
- Manage MDS data submissions by suppliers, including evaluating whether they comply with legal requirements (GADSL, ELV), IMDS requirements, and ISO standards (accepting/rejecting MDSs). Follow up with suppliers to ensure that MDS submissions are correct;
- Attend project meetings with the Project Manager and the main R&D disciplines;
- Utilizing Jira for task tracking and better communication with the team;

Mechanical Design Engineer @ ALTEN Romania

Dec 2018 - Nov 2021 • Iasi, Romania / Remote

- Ensured design compliance with product specifications and standards requirements.
- Created and modified drawings in Catia V6.
- Applied mechanical problem solving skills to develop creative solutions for quality products.
- Electronic checking, releasing and sending of 2D drawings to customer.
- Provide specific technical reports.
- Identify design errors, omissions, and other deficiencies on drawings and recommend revisions in procedure layout.
- Interpreted technical drawings, schematics and computer-generated reports for new product development.
- Performs quality routine assurance on data and database.
- Generate and manage documentation for clients
- Reviewing, analyzing, reporting, and presenting data in an accessible manner
- Managing lifecycle of components and drawings
- Officialization of supplier design/product and technical specifications
- Responsible to supervise the validation plan in accordance with the standards
- Releasing and sending 3D models and 2D drawings to customer.
